

OUTPOST 4x4

RAPID MOBILE WORKSHOP

Built for the world's toughest environments.

ANYWHERE. ANY CONDITION. NO ROADS? NO PROBLEM.

Desert. Mountains. Rainforest.
Swamp. Open fields.
Pipeline corridors. African bush.
Military-grade 4x4 — built in, not bolted on.

A REAL WORKSHOP. WHEREVER YOU NEED IT.

- ◆ Gear reduction + diff locks - goes where your equipment goes.
- ◆ Your excavator broke down? Nearest town is 4 hours away? This truck is already there.
- ◆ A tire changer fits inside. So does a welder. So does a compressor. All at once.
- ◆ No infrastructure needed - your team works that day.

The payload is in a different category from any pickup truck. You're not choosing between a compressor and a welder - you bring both. And the tire changer. And the generator. And still have room for parts.

Field-tested on pipeline and infrastructure projects, and remote agricultural operations across three continents. Standard configuration available - or we can build around your specific operation.

OUTPOST (4x4) - TECHNICAL DATA

Engine	SOFIM 2.8 L (76 kW / 103 HP)
Transmission	Manual, 5-speed
Differential locks	Front, center, rear
Ground Clearance	286 mm
Max speed	110 km/h
Wading Depth	700 mm
